Now let's move onto our training for this week with all about videos...

Overview for Today

- How to Rank Videos that Get Traffic and Results
- Live Demo / Example
- Q&A

How to Rank Videos

- There are a couple main kinds of videos that can be awesome for ranking AND making money:
 1. Videos answering questions
 2. Video reviews
- In both cases you'll want to do your keyword research in a similar manner to what we suggest for websites...
 - Search YouTube for preferred keywords and see how many exact matches there are followed by "close" matches (you don't want more than a couple exact matches to have the best chances).
 - Target the keywords in your title and description.
 - Going the extra mile – leave comments linking to it or do a blog post on it.
 - Use Video Firestorm in WebFire to help with this if you want.

How to Get Traffic to the Videos

- You'll want to make sure that you not only target keywords that you have a chance of ranking for on YouTube, but you should also see what your chances of ranking on Google are (do a search for the main keyword and see how many results show up there too – two or less exact matches is good).
- You'll want to also make sure that your keyword appears to get traffic (tricks to check – keyword tool, using predictive keyword search, and just checking other videos and their view count).
- Keywords that are questions where you answer a specific problem can be a great way to find potential prospects that would be interested in your topic.
- Likewise, keywords that are more likely to be from potential buyers can be a great way to focus your time on what brings in money (like reviews or questions people search for before buying – examples).
- Make sure that your titles are catchy and not just SEO friendly (examples)
- Make sure that the start is especially catchy and attention grabbing
- YouTube trick to siphon traffic from others (live example later)

How to Make More Money from Videos

- Make sure that you have a good call to action at the end.
- Make it obvious what you want them to do or where you want to go.
- If it's a review, make sure that you follow a simple format of what it is, what the pros and cons are, a short summary, and what you think they should do with a call to action.
- If it's a question you're answering, make sure that you make it short and precise, as well as give them additional info with a link for where to find more, where to get the best deal, etc.
- Links mentioned in the video, description, comments, etc. can help.
- Don't drag it on with boring stuff off point, especially if you're looking to make money from a hot prospect.
- Asking them to subscribe, like, share, and/or comment can help you get more traffic, subscribers, and make more all at the same time (YouTube looks at this stuff for rankings too).
