Way #1

- **Use the Video Firestorm Tool in WebFire to Create Review Summaries of Products**

- Create simple, short videos that summarize all the reviews / opinions you've read online about a particular product, as well as summarizing your overall feelings for the product (example...)

- Do keyword research with WebFire to target the best review type keywords while still making the title appealing (examples)

- Format is simple: Title, Brief Overview of Product, Pros and Cons, Your Conclusion, and a Call to Action

Way #2

- **Create Content Answering Common Questions (Blog Posts or Videos) and Monetize with Affiliate Offers for the Solutions**

- Do keyword research and forum / Q&A research to see what questions people are searching in any given niche.

- Then target the questions in your titles / title tags and provide an insightful, easy to read answer.

- Follow it up with specific affiliate recommendations.

- Turbo charge this by using the lead tools to find people asking such questions and point them to your link with the answers!

Way #3

- **Use the Guest Blog Tool inside of WebFire to reach out to blogs in your niche that accept guest blog posts to get extra exposure for your products (as well as extra authority and rankings)**

- Use the Guest Blog Tool and submit guest blog posts to several relevant blogs that appear to have lots of readers ... all while mentioning your offer without being too obvious (examples...).

- This not only can drive extra traffic to your offers, but it can help your rankings and paint you more and more as an authority in your niche!

- Greatly increase your chances of getting exposure by making sure that your content is legitimately awesome and useful.

Way #4

- **Use the Competition Backlink Tool to Get Traffic from the Same Sources Your Competitors Do!**

- Use the Competition Backlink Tool to find out where your competitors get their traffic from, and then instantly e-mail those sources to inquire about guest blog posting, paid ads, sponsored mailings, etc.

- If your competition uses them, most likely it's for a reason!

- Cool Twist – In a similar fashion, you can use this tool to reach out to potential white label or other types of partnerships (one deal can make an entire business).

Way #5

- **Use the SEO and Keyword Tools to Find Hidden Gems where You Can Easily Rank for Big Affiliate Payouts (or for easy products you can make)**

- There's TONS of niches and sub-niches that are often wide open from a ranking perspective.

- Even some of the biggest niches out there have wide open sub-niches where there's either affiliate offers with big payouts or easy product ideas (could be as easy as interviewing someone and turning it into a product).

- If you really put the effort into it, you can have a website created and optimized, as well as a product made, all within a day.

- Pro Tip – Even if you do ten of these and nine fail, that's okay! As the one that works you can then build out a funnel to grow the profits more and more … all while also expanding the traffic you drive to it.
